Funnel, Low Profile

RJ28210

Details

Polyethylene spill control funnel has a low profile and wide diameter for a big 'target' and quick, easy pouring. Scalloped, sloping design minimizes splash and prevents containers from resting in their own liquids. Large flat well at throat of funnel allows for passive draining of paint cans, filters, buckets and other containers. Molded-in hook makes it convenient to store optional funnel cover. Threaded bung cap seals in flammable vapors under normal storage conditions. In an emergency, pressure relief valve opens to protect drum and prevent explosion. Measures 21" dia. x 3.25" H.

- Polyethylene spill-control funnel
- For quick, easy pouring
- Minimizes splashing
- Flammable vapors are sealed in
- Pressure relief valve

Specifications

Manufacturer	Justrite
Dimensions	21 in dia x 3.25 H
