

# Double Alloy Hollow Tine with Carbide Tip - .750MT x 4.750L x .640OD R411

## Details

The R&R Carbide-Tipped Alloy Hollow Tine construction is the same special high carbon alloy steel tubing and hardened to RC45-48 as the alloy hollow tines, with the addition of a carbide tip for even longer life. The advantage of using carbide tipped tines is the ability to maintain your maximum aerating depth consistently over the life of the tines. You can expect these tines to last 6-8 times longer than the R&R Standard Hollow Tines. Carbide tipped tines are not recommended in rocky soil conditions, as carbide, which is extremely wear resistant, can break when encountering hard impacts in rocks.

## Replaces

Salsco D-028

## Specifications

|                                  |                  |
|----------------------------------|------------------|
| Manufacturer                     | R&R Products     |
| A - Tine Type                    | Alloy Hollow     |
| B - Tine Mounting Dia.           | .750 in (19mm)   |
| C - Tine Length                  | 4.75 in (121mm)  |
| Carbide Tip                      | Carbide Tip      |
| D - Tine Tip Outside (Hole) Dia. | .640 in (16.3mm) |
| E - Tine Tip Inside (Core) Dia.  | .500 in (12.7mm) |
| F - Tine Wall Thickness          | .049 in (1.2mm)  |
| Savings                          | Volume Buy       |
